

JDBC Practical session (PostgreSQL and Eclipse)

STEPS TO PERFORM:

- 1) Import packages
- 2) Load and Register the driver
- 3) Create Connection
- 4) Create a Statement
- 5) Execute the query
- 6) Process the query
- 7) Close

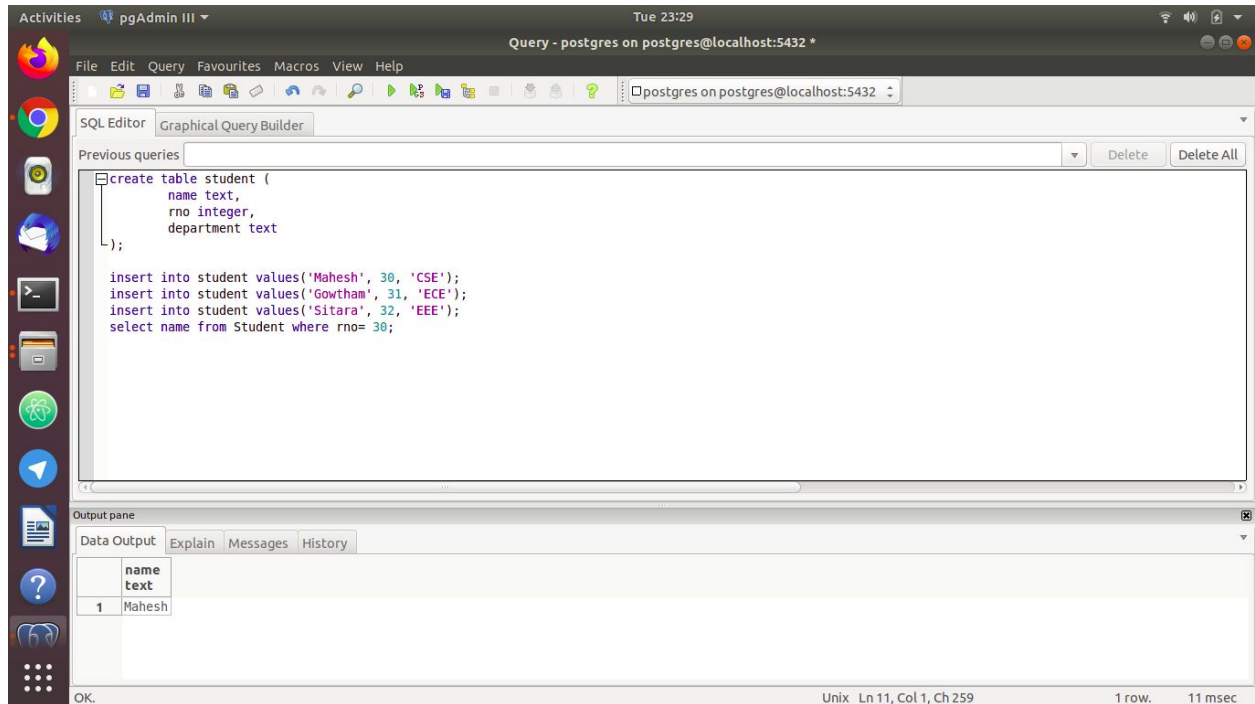

Step 1

Here I have just imported the packages
`import java.sql.*;`

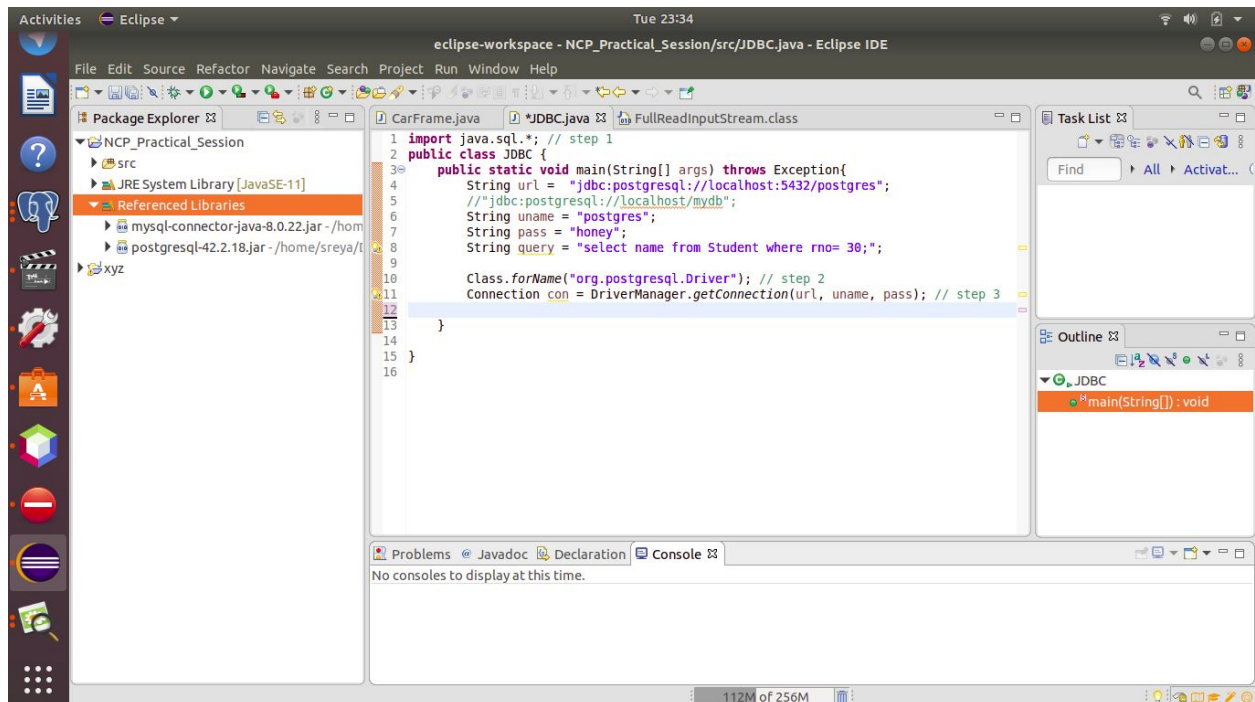

Step 2

Later downloaded PostgreSQL JDBC Driver and loaded in Eclipse(Libraries).
And in pgadmin3 I created a Student table

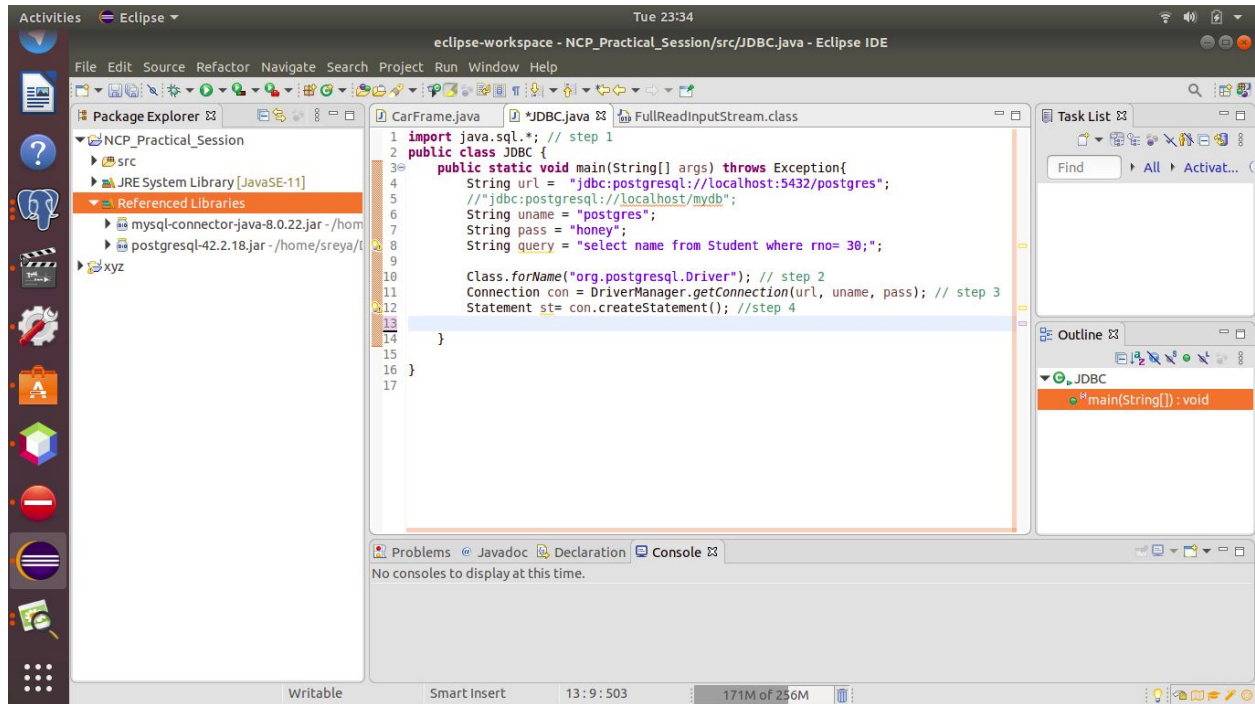

Step 3

Created a connection

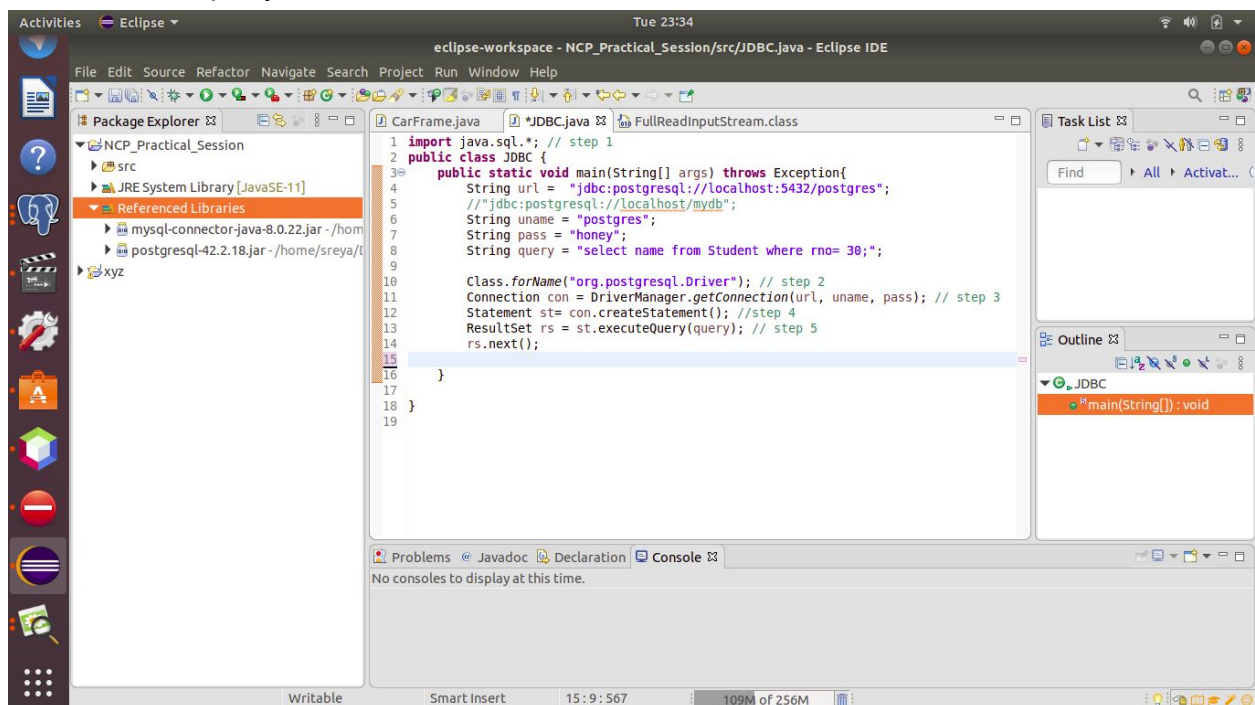

Step 4

Created a Statement

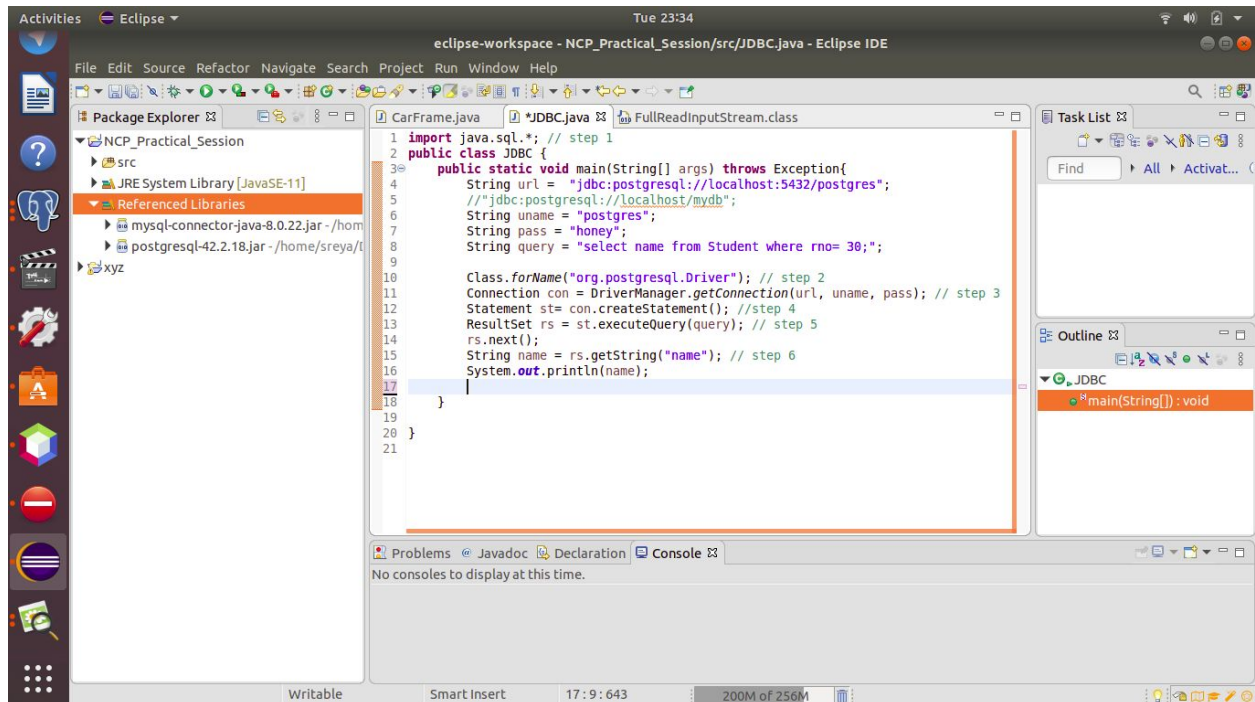

Step 5

Executed the query

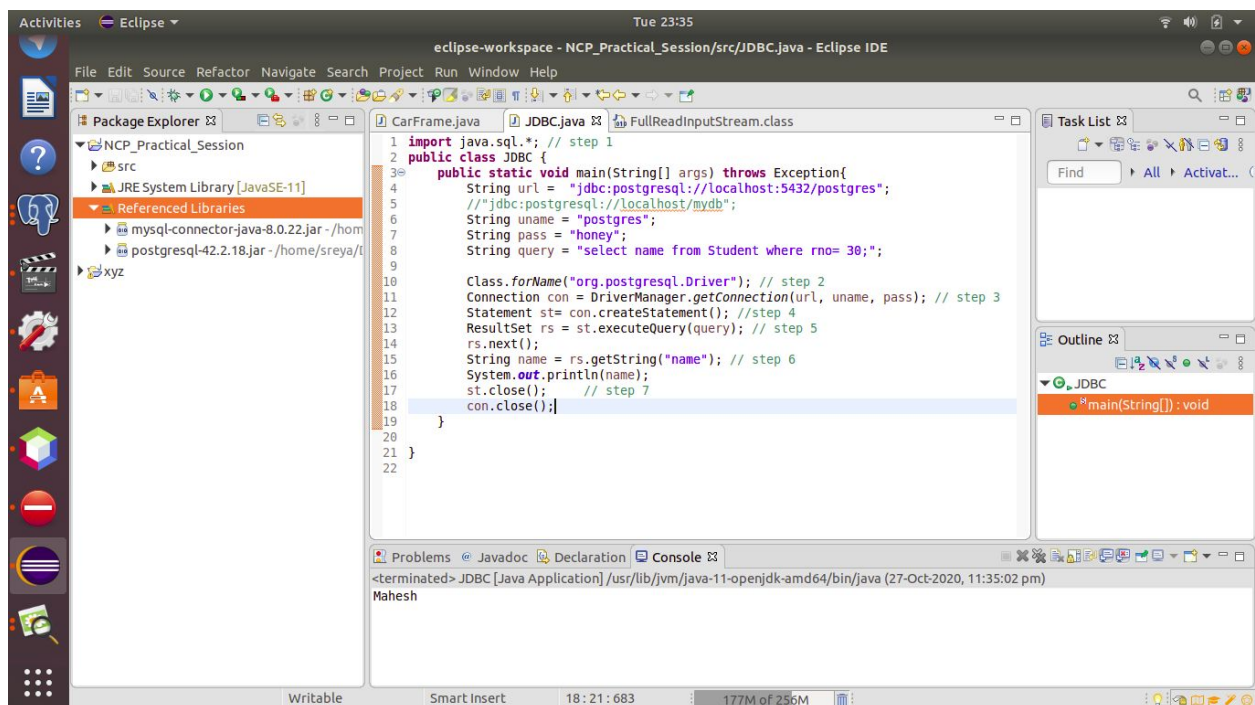

Step 6

Processed the query

Step 7

Closed the statement and connection.

Output: Mahesh

Query: select name from Student where rno= 30;
